

HM-1 Smart Hive Temp/Humidity Sensor

WHAT GETS MEASURED GETS MANAGED

- Peter Drucker, Management Expert

Measure your hives:
www.solutionbee.com

The new HM-1 Smart Hive Temperature and Humidity Sensor is an ideal additional tool for the cost conscious backyard or hobbyist beekeeper. The HM-1 measures and stores **temperature and humidity readings every hour**. These readings are precise and can measure even very slight changes in internal hive temperature and humidity. Sensors can be read with an Android or iOS smartphone that is equipped with Bluetooth technology (most smartphones).

- Individual monitors are read one-by-one with the B-ware™ Phone App loaded on your Android or iOS smartphone.
- A Bluetooth connection is easily established by simply coming within range of the sensor with your smartphone. Data is uploaded with a tap to the app.
- Comes with your choice of **medium or deep frame** with a special pocket for the sensor.
- View your hive characteristics in detail with **trend graphs** generated from data gathered by HM-1 Sensor and analyze them together with your HM-5 weight trend data.
- **A consistent 95F temperature graph – day and night -** is an indication of **excellent brood management** by your bees. **Fluctuations** in temperature indicate **less than ideal brood production**.

Models	
HM-1M, HM-1D	
Operating Temperature Range	-20F to 140F (-30C to 60C)
Humidity range	0 to 100% (non-condensing)
Size	1.7"x1.7"x0.5" (4.2cm x 4.2cm x 1.3cm)
Battery Life	3 years
Communication	Bluetooth BLE
Frame Sizes (with black plastic foundation)	M...medium hive body D.....deep hive body

Beehive Monitoring System

Solutionbee delivers the highest quality beehive monitoring system in the industry with the most value. Reliable, technical and user-friendly solutions are Solutionbee's specialty.

Solutionbee's dedicated customer technical support assists distributors and end-users to set-up and maintain the hive monitoring equipment.
